

Short answer:

Pikas – No

Jackals – Not really (only background canid types; no confirmed jackal characters)

Coatis – No

Long answer:

In Zootopia (2016), hundreds of species appear, but not all are shown as named characters.

Pikas

Pikas do not appear in the film or official supplemental material. No background pikas are known either.

Jackals

While Zootopia includes various canids (foxes, wolves, some “generic” background dog-like mammals), no confirmed jackal species appear. Some fans believe certain background models resemble jackals, but there is no official confirmation from Disney.

Coatis

Coatis do not appear in Zootopia. No characters or background extras are modeled after coatis.

If you'd like, I can list all confirmed species in the film or help identify animals from specific scenes!
